TABLE OF CONTENTS

		PAGE
William Jesse Goad Land (with portrait)	*C. J. Chamberlain*	1– 2
Gross morphology and histology of developing fruit of the apple	*H. B. Tukey and J. Oran Young*	3– 25
Effects of growth-regulating substances on shoot development of roses during common storage	*Paul C. Marth*	26– 49
Susceptibility of *Colchicum* and *Chlamydomonas* to colchicine	*Ivor Cornman*	50–62
Biochemical nitrogen fixation studies. IV	*F. E. Allison, S. R. Hoover, and F. W. Minor*	63– 71
Microsporogenesis and development of seed in *Lobelia cardinalis*	*George O. Cooper*	72– 81
Volatile sulphur content of black mustard plants	*Scott V. Eaton*	82– 89
Cell size in developing ovaries of *Iris fulva*	*H. P. Riley and Dorothy Morrow*	90– 98
Effects of photoperiod on microsporogenesis in Biloxi soybean	*C. S. Nielsen*	99–106
Cytology of apogamy in *Polysticum tsussemense*	*Sister Mary T. Patterson*	107–114
Effects of growth substances on reserve starch	*S. C. Bausor*	115–121
Chloroplast substance of spinach leaves	*C. L. Comar*	122–127
Physiological studies on mosses. IV	*S. L. Meyer*	128–132
Effects of light quality on growth and mineral nutrition of bean	*L. M. Rohrbaugh*	133–151
Device for measuring entry of water into roots	*H. E. Hayward, Winifred M. Blair, and P. E. Staling*	152–160
Effects of platinum chloride on bean and tomato	*Charles L. Hoenner*	161–166
Development of the node in *Ricinus communis*	*Mary E. Reynolds*	167–170
Variations in chromosomal association and behavior during meiosis among plants from open-pollinated populations of *Dactylis glomerata*	*W. M. Myers and Helen D. Hill*	171–177
Influence of controlled-atmosphere storage on respiration of McIntosh apples	*Robert M. Smock*	178–184
Development of the macrogametophyte of *Miersia chilensis*	*Marion S. Cave*	185–187
Potassium and phosphate nutrition of pineapple in relation to nitrate and carbohydrate reserves	*G. T. Nightingale*	191–223
Growth substances and dormancy of spores of *Phycomyces*	*W. J. Robbins, Virgene W. Kavanagh, and F. Kavanagh*	224–242
Histological responses of *Vicia faba* to indoleacetic acid	*Barbara F. Palser*	243–263
Studies in Californian Hepaticae. III	*A. W. Haupt*	264–272
Spindle abnormalities in *Mentha*	*C. P. Swanson and Ray Nelson*	273–280
Comparative anatomy of synthetic auxins and derivatives	*G. S. Avery, Jr., J. Berger, and B. Shalucha*	281–287
Anatomy and histology of the Eureka lemon	*E. S. Ford*	288–305
Influence of sulphur deficiency on metabolism of black mustard	*Scott V. Eaton*	306–315
Nutritional effects of boron on growth and development of the sunflower	*Benjamin Lowenhaupt*	316–322
Differentiation of avocado blossom buds in Florida	*Philip C. Reece*	323–328

36156

		PAGE
Optimal conditions for the hydrolysis of arabogalactan by *Aspergillus niger*	*E. J. Ratajak and H. S. Owens*	329–337
Treatment of seeds with synthetic growth-regulating substances	*W. S. Stewart and C. L. Hamner*	338–347
Chemical changes accompanying growth and development of seed and fruit of the Elberta peach	*F. A. Lee and H. B. Tukey*	348–355
Histological study of freezing, desiccation, and winter injury of raspberry canes	*A. O. Simonds*	356–361
Effects of vaporous naphthoxyacetic acid on development of tomato fruits, with special reference to their vitamin C content	*J. W. Mitchell and Muriel R. Whitehead*	362–365
Charles Joseph Chamberlain (with portrait)	*J. T. Buchholz*	369–370
Vegetation and substrate of Cranberry Glades, West Virginia	*H. C. Darlington*	371–393
Survey of anatomy, ergastic substances, and nuclear size in *Echinocystis macrocarpa*	*Flora M. Scott*	394–408
Translocation of the floral stimulus in *Xanthium*	*Alice P. Withrow and R. B. Withrow*	409–416
Nature and rate of development of root system of *Convolvulus arvensis*	*J. C. Frazier*	417–425
Developmental anatomy of the fruit of the Deglet Noor date	*E. M. Long*	426–436
Development of sorus and prothallium of *Acrophorus stipellatus*	*Betty F. Thomson*	437–442
Anatomical studies of the roots of juvenile lodgepole pine	*R. J. Preston, Jr.*	443–448
The chlorophyll-protein complex. II	*L. S. Moyer and M. M. Fishman*	449–454
Effects of vitamins on germination and growth of orchids	*G. R. Noggle and F. L. Wynd*	455–459
Transplantation experiments in peas. III	*F. W. Went*	460–474
Effects of application of thiamin to *Cosmos*	*James Bonner*	475–479
Relationship of dissociation of cellular proteins by incipient drought to physiological processes	*Henry T. Northen*	480–485
Defoliation of tomato plant as a response to gaseous emanations from the fruit	*John Skok*	486–489
Varietal differences in anatomy of cross-section of wheat grain	*J. C. Bates*	490–493
Effects of micro-nutrient deficiencies on growth and vitamin content of the tomato	*C. B. Lyon, K. C. Beeson, and G. H. Ellis*	495–514
Effects of solvent upon absorption spectra of chlorophylls *A* and *B;* their ultraviolet absorption spectra in ether solution	*D. G. Harris and F. P. Zscheile*	515–527
Cyto-genetic consequences of X-ray treatment of pollen in *Petunia*	*C. M. Rick*	528–540
Analysis of variance and covariance of chromosomal association and behavior during meiosis in clones of *Dactylis glomerata*	*W. M. Myers*	541–552
Cytological studies in relation to the classification of the genus *Calochortus*. III	*J. M. Beal and Marion Ownbey*	553–562
Meiosis in autotetraploid *Secale cereale*	*J. G. O'Mara*	563–575

		PAGE
Composition of the tomato plant as influenced by nutrient supply in relation to fruiting	*D. I. Arnon and D. R. Hoagland*	576–590
Effects of nutrient-solution concentration on the growth of *Marchantia polymorpha*	*P. D. Voth*	591–601
Chromosome numbers in the subfamily Aurantioideae, with special reference to the genus *Citrus*	*C. A. Krug*	602–611
Influence of temperature on photoperiodic reactions in leaf blades of Biloxi soybean	*M. W. Parker and H. A. Borthwick*	612–619
Occurrence of aneuploids in *Lilium*	*R. N. Stewart*	620–626
Cytology of the autotetraploid rye	*T. C. Chin*	627–632
Role of pyrenoids in algae and of vacuoles in plastids of higher plants and in fungi	*S. R. Bose*	633–638
Effects of growth-regulating substances on a parthenocarpic fruit	*H. E. Clark and K. R. Kerns*	639–644
Nucleolar stain and nucleal reaction	*C. S. Semmens*	645–649
Pollen-tube development in *Taraxacum officinale*	*Elaine J. Katz*	650
